

BLUE MONGREL HEAVY DUTY PROTECTIVE KNEE PADS **C35SD**

Code: C35SD

The C35SD Heavy Duty Knee Pads is designed for wearers who need to kneel for longer periods and need a higher level of comfort and protection. The pad is thicker and has a better level of grip to avoid slipping whilst working with potentially dangerous tools or welding equipment.

There is a single bottom strap that keeps the pad in place without cutting off circulation in the top of the leg that can happen when kneeling for long periods with kneepads that have top straps.

C35SD Heavy Duty Protective Knee Pads

- Acid, oil & heat resistant surface for superior knee protection
- Stability ridges provide a stable working position
- The pads are made from hard wearing polyurethane
- Ergonomic strap configuration keeps pads in place
- One size fits all

The actual Polyurethane pads have been tested by AWTA to Australian Standards for:

- Abrasion Resistance AS 2001.2.28
- Heat Resistance AS 1441.7
- Heat Resistance DEF(AUST) 5037 A26
- Thickness Loss AS/NZS 2111.2
- There have also been successful tests for resistance to Acid, Oil and Alkaline.

Stabiliser Insert

This Stabiliser is designed to minimise the movement of the knee pad when it is being worn. The Stabiliser also offers a higher level of comfort and impact protection from the ergonomic design using texture and nodules. The Stabiliser inserts are made from a hardwearing and lightweight material that has gained great acceptance in the casual footwear market.
