

OLFA ROTARY CARPET CUTTER C36

Code: C36

OLFA® Carpet Cutter C36 provides for precision cutting without damage to the cutting base surface. Design allows for safer cutting as majority of blade edge is concealed and handle design keeps hand away from the blade. C36 uses a 45mm rotary blade that does not rotate when cutting. When the blade edge is dull, simply revolve the black dial slightly to obtain a sharp new edge.

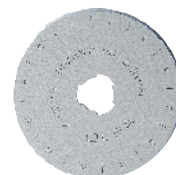

In applications where someone needs to protect the product or materials underneath, C36 is designed so that the blade doesn't come in contact with product/materials therefore preventing damage. Perfect for cutting linoleum, carpet, shrink wrap and nylon straps.

OLFA® Carpet Cutter - C36

- Cuts carpet and linoleum without damaging the base fabric
- Quick blade change feature
- Ergonomic handle design for comfortable cutting
- Features a highest quality tungsten steel rotary blade for superior sharpness and durability
- Perfect for cutting linoleum, carpet, shrink wrap and nylon straps
