

The Safety Cutter is one of the first tools Slice designed and remains popular. Initially conceived for household use—it excels at opening packing tape and retail packaging.

The Safety Cutter is used widely in industrial settings worldwide. Its micro-ceramic blade cuts thin materials effectively while safeguarding fingers. The Safety Cutter comes equipped with a lanyard hole and built-in magnet to keep it close at hand.

Features:

- Rubberized non-slip finish
- Ambidextrous design
- Micro ceramic blade
- Integrated magnet and lanyard hole

Suitable applications:

Packing tape

Retail packaging
