Cutting Safety

45° ANGLE
LESS FORCE = EASIER WORK = LESS RISK OF INJURY

- Always cut in a 45° angle for an easier and safer cutting experience.
- When cutting corrugated cardboard, tilt the knife slightly sideways. This significantly reduces the necessary force.
- Ensure that films and tapes are always taught, before you cut them. The blade will cut your material better.
- Always cut away from your body

Signs of Wear & Tear

- Worn, gouged or chipped guard
- Worn tip
- Worn, dull or chipped blade
- Requires more force to cut
- Creates jagged cuts

MAINTAIN YOUR CUTTING SPEED & REPLACE BLADE HEAD WHEN WORN

KLEVER

Safety Concealed Cutter

Two Sided Head

KLEVER KUTTER

The KLEVER KUTTER is our all-rounder and the forerunner of all safety cutters. The KLEVER KUTTER is small, handy, versatile, and comes with a concealed blade which allows it to be within the highest level of safety, protecting users and goods at the same time. It's double blade head allows it to be particularly economical and is ideal for single-wave corrugated, cardboard, foil, adhesive tape, bagged goods, strapping tape, paper, string and many more. The KLEVER KUTTER is disposable and comes with a practical eyelet for lanyard fastening or hanging. Here in bright orange and also available in other numerous colours.

Features & Benefits

- Recessed blade reduces cut injuries and damaged goods.
- Cuts boxes, film, tape, and many more applications.
- Small, convenient, and durable with high quality carbon steel blade
- Custom logo printing
- Highest safety level
- Disposable
- No replacement blade
- Made in USA with high quality German blade
