

Code: Pelican

The Pelican Metal Detectable Film Slitter is ideal for food and pharmaceutical processing industries. The slitter is made with metal detectable plastic material which helps reducing the risk of undiscovered foreign matter in the goods and consequently also the risk of product recalls. It also uses "food contact approved" stainless steel blades to reduce risk of food contamination. It is also ideal for cutting box straps, shrink wrap, string or cardboard. The pointed design makes it easy to penetrate cardboard boxes and plastic bags.

### PELICAN Metal Detectable Film Slitter

- Designed for easy cutting of shrink wrapped pallets and packagings
- Specifically designed for the food processing industry as it features a metal detector responding material
