Smart Retracting Utility Knife

With Slice® Ceramic Blade - 10558

SLICE-SMART RETRACT

- ergo-pull™ slider reduces strain by:
- encouraging correct wrist alignment
 - allowing thumb position
 - providing optimum grasping force
 - reducing muscle effort

The Slice® Smart-Retracting Utility Knife unique finger-friendly® blade is safe to the touch and therefore causes fewer and less severe injuries than traditional blades. To further protect your workers, the blade instantly self-retracts when it loses contact with its cutting material. The Ergo-Pull™ slider that extends the blade reduces hand strain because users slide this feature in the same direction as the cut. While a durable reinforced nylon handle provides strength and comfort, so the multi-purpose knife is ideal for industrial usage - especially as it has a longer blade for thicker cuts. Tool-free blade-change mechanism help workers operate more efficiently.

Features & Benefits

- Finger-friendly® blade is the only safety blade on the market
- Smart retraction pulls in blade when cut is complete
- Ergo Pull™ slider reduces hand strain
- Longer blade for thicker cuts
- Durable reinforced nylon handle built for industrial use and comfort
- Suitable for left and right-hand users
- Integrated lanyard hole for easy access
- Simple and quick no-tool blade change
- Non-conductive blade for added safety
- Chemically inert blade that never rusts
- Slice® blades last 11.2x longer than traditional blades
- Blades are reversible

Replacement Blades

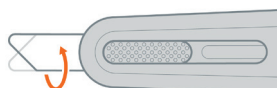

10526 rounded tip

10528 pointed tip

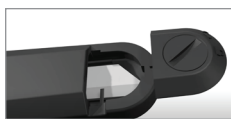

Switch blade orientation for lefties
