

# The **NEW** Handy+ is here!

The **Handy+** is a cost-effective scraper solution for light, occasional scraping. With its 80 mm-wide head, it is ideally suited for removing spots of paint, small sticky labels and tape from windows.

The blade holder now completely covers one edge of the blade, and the symmetrical designs lets you insert the blade from either side. This makes replacing the blade safe, fast, and easy.

## Recycled Plastic Handle

JBF recognizes the pivotal role of the manufacturing industry in propelling the green transition, and we are actively engaged in this transformative journey. As part of our commitment to advancing the green transition, we are dedicated to crafting our products from **recycled materials** wherever possible. This commitment extends to Handy that is exclusively using recycled plastic.
